

FortiVoice™ 200D/200D-T

The Voice Appliance for Enterprise Networks

The FortiVoice 200 series IP PBX voice solution gives you total call control and sophisticated communication features for excellent customer service and efficient employee collaboration. Powerful, affordable and simple, the FortiVoice 200D and 200D-T systems deliver the features and value of the proven FortiVoice product line to offices with up to 2000 phone users. FortiVoice phone systems include everything you need to handle calls professionally, control communication costs and stay connected everywhere.

Built-in fundamentals

FortiVoice systems include all the fundamentals of enterprise-class voice communications, with no additional licenses to buy or cards to install. Auto attendants, voice messaging, ring groups, conferencing, multibranch integration and much more are built-in. The FortiVoice system is easy to purchase, easy to install and easy to manage, so you save the headaches that come with most enterprise phone systems.

User appeal

Your people will like it too. In addition to working with the user-friendly series of FortiFones, the FortiVoice personal web portal lets your staff view their call logs, configure and manage their own messaging and access other features. Your employees get control over their phones, and your IT staff get a break from having to configure every little change.

Voice on the network, from the network security experts

Nobody knows more about keeping your network secure than Fortinet. The FortiVoice 200 systems extend that expertise to your IP voice communications. Plus, the FortiVoice system and FortiFone IP phones are tailor-made to work with the full Fortinet environment of network security appliances and applications. Your voice and data networks are seamlessly integrated and powerfully protected.

Don't forget the FortiCare

Your phone system is an essential business tool, so it's eligible for the FortiCare support program. FortiCare ensures that it has the protection it deserves, with advanced hardware service and a dedicated technical assistance team to help you if issues ever arise.

The network voice solution from the network security experts

- ✓ No licensing; built-in features, including auto attendants, voicemail, music on hold, remote extensions and much more
- ✓ TLS-encrypted SIP
